

October 3, 2018

The new Regional MLS Board of Directors convened in September, taking some foundational steps:

- The ACH process (electronic checking account payments) will continue to be utilized due to the cost-efficient nature of the process. Prior to the actual launch, a procedure for MLS Users to reauthorize payment will be distributed to all current MLS users in both markets. Subject to change, if the MLS implementation proceeds according to schedule, the first payments for the new system will begin in February.
- A 2019 budget was adopted, resulting in MLS fees of \$30 per month for agent-subscribers; \$71 for broker-participants.
- The public records data (CRS Data) integrated into the system will increase to 19 counties in Nebraska and Iowa.
- The Homesnap Pro mobile app will continue to be provided at no additional charge.

This month, the MLS staff is working long hours to convert MLS data for alignment to national data-standards, and to convert MLS data from the Lincoln area into the Black Knight Paragon MLS system.

The 2019 Board of Directors:
