

# Get the power of the MLS in your phone

## The best way to access real-time MLS data on the go

- Snap any home to find out all about it
- Search listings and rentals by address, zip code, map, MLS ID and more
- Connects to your existing MLS account, always logged on
- Access agent-only data like commission splits and showing instructions

## Analysis of every agent's activity and deal history

- See every agent's stats, including number of sales, location, list vs. buy and average price
- See portfolio of every agent's deal flow for the last 2 years
- Analyze every agent's price reductions, days on market and close rate

## Instant info on any home, not just listings

- Basic facts, value, last sale date and price
- Rent estimates, rent history and investor score
- Listings, price changes, contracts, sales and off-markets
- Unified property history with all past listings of every home
- Accurate lot boundaries
- Similar active listings and sales comps
- Up to date school attendance zones

## Simple, integrated messaging and communications

- In-app, one-tap messaging to communicate and share homes with clients and other agents
- Automatically track the agents you view and work with the most
- Complete directory of every office and agent in the MLS
- One-tap access to the listing agent, right from the listing
- In-app integration with showing platforms
